RESPONSE AMENDMENT

SIR:

This is responsive to the Office Action dated April 15, 2009 in connection with the
above-referenced patent application, a response to which is due by July 15, 2009.

The applicants have amended the application as follows:

Amendment to the Specification begin on page 2 of this paper

Amendment to the Claims are reflected in the listing of claims which begins on page 3 of this
paper.

Remarks/Arguments begin on page 11 of this paper.

Attorney Docket No. 601-4

Please amend paragraphs 001, 002, 003 and 004 in the specification as follows:

[001] The present invention relates to 2-substituted phenyl-5,7-dihydrocarbyl-3,7-dihydropyrrolo[2,3-d]pyrimidin-4-one derivatives, the process for their preparation, the composition containing them, and the use for treatment and/or prevention of sexual dysfunction and other diseases related to ~~phospholipase~~ phosphodiesterase 5.

[002] Sildenafil, disclosed in WO9428902, is first kind of orally-administrated potent inhibitors of ~~phospholipase~~ phosphodiesterase 5 in treatment of the erectile dysfunction of man. By inhibiting the ~~phospholipase~~ phosphodiesterase 5 in corpus cavernosum-, it can achieve the purpose of relaxing smooth muscle in human corpus cavernosum, improving penile hyperemia so as to result in erection. The effective rates of sildenafil in treating male sexual organs erectile dysfunction amount to 80%.

[003] Also, Pfizer Ltd. has developed a series of 1,6-dihydropyrrol [4,3-d] pyrimidin-7-one derivatives, and broadened their therapeutic area where such indications was thought to be treated by inhibiting ~~phospholipase~~ phosphodiesterase 5. All of these compounds are disclosed in EP0951098, WO9849116, US6251904, and WO0024745, and the latter two of patents include the compounds whose substituted phenyl on C-5 is replaced by the substituted pyridin-2-yl. On the basis of the structure of Sildenafil, DONG A PHARMA Co. Ltd. of Korea developed a series of mono substituted derivatives in the nitrogen atom of sulfonylamino group, as disclosed in WO0027848 and WO0198304. Presently, as described in WO0216364, in order to further enhance water-solubility, LG Chem. Invest. Ltd. disclosed the derivatives of 1,6-dihydropyrrolo[4,3-d]-pyrimidin-7-one with polyethylene glycol. In addition, 1,5-dihydropyrrolo[3,4-d]pyrimidin-4-ones and 1,9-dihydropurin-6-ones were developed by Pfizer Ltd. for the treatment of sexual dysfunction(US6100270). WO0160825 disclosed 3,5-dihydropyrrolo[3,2-d]pyrimidin-4-ones are useful for the treatment of impotence. Recently, 3H-imidazo[5,1-f][1,2,4]triazin-4-ones was disclosed by Bayer Co. Ltd. in the patent application DE19881732.

[004] The object of the present invention is to provide compounds for treatment of sexual dysfunction and other diseases related to ~~phospholipase~~ phosphodiesterase 5.

Attorney Docket No. 601-4

REMARKS

Claims 1-4, 6-7, and 10 are pending. The specification was objected to because of informalities. Claim1 was objected to because of various informalities and Claims 1-4, 6-7, and 10 have been rejected under 35 U.S.C. § 112, second paragraph, as allegedly indefinite.

By this Amendment, Applicants has amended claims 1 and 10 and added new claims 11 and 12. Support for amendments to claim 1 and 10 and new claims 11 and 12 may be found in the specification and claims as originally filed. No new matter has been added. Applicants respectfully request reconsideration and allowance of all pending claims in view of the remarks set forth below.

The specification was objected to because of informalities throughout the specification. Applicant has amended the specification to correct typographical error.

The Examiner made several objections to claim 1. Applicant believes that the informalities objected to have been corrected in Claim1.

The Examiner rejected claim 1 and dependent claims for alleged vagueness based on lack of antecedent basis and other informalities. As amended claim 1 clearly defines the variables and the species in claims 4 and the intermediates in claim 10 have clear antecedent basis from claim 1. Thus, the amendments to the claims obviated the rejection.

It is believed all claims are now in condition for allowance, which is respectfully solicited. The Examiner is authorized to deduct additional fees believed due from our Deposit Account No. 50-4771.

Respectfully submitted,
